Dear Charan,

I complained about my 'Fatal' suicide injury that led to permanent scarring and numb feet/memory issues to the HCC, the MHCC, The office of the information Commissioner and also the Victorian Ombudsman.

Every statutory agency rejected me, and so do police.

The CEO of the hospital who I had offered a conciliation with was so thrilled with the ombudsman ruling 'nothing to see', despite human rights abuses and discrimination (which the HREOCV will not advocate for me for), baited me to sue him directly for the systemic oppression which went for years and landed me in hospital diagnosed as m'psychotic' when in fact, the conspiracies linked to my former asio partner and the murders etc were actually factual which proved not only their negligence and malpractice but the movement was actual and the mechanism was to silence evidence that could be legally heard before a court.

'He asked me to sue him directly knowing he was utterly impervious to law, and that I had been framed systemically and universally with government agencies institutions and statutory authorities.

You see, the arm of the hospital that was supposed to care for me, only saw me twice - the second time ten months later to exonerate me from the system

I have now been denied whistleblower status from ASIC and ombudsman and IBAC

What do you think I should do now that I am a marginalised innocuous pleb with zero voice yet famous in an Australian democracy with no medical care or protection from police, in fact the opposite whereby they like the others victimise vilify and heinously maim my life my business my voice and desecrate my finances.

I have nothing

But you cannot take my soul.

I made a website www.killhim.info because that is the nature of the game that a suicidal patient will take their own lives via the violence of systemic neglect and oppression in which they can be kicked down the road to aid and abet my death.

Like you will now that you won't get back to me.

I found it interesting that Mark Dreyfus wants a national anti corruption commission.

Here is his chance

Kindly

RM

Hi Richard,

I am very sorry for the delayed reply. We just discovered that Outlook mistakenly sent your email to our junk folder.

I am also very sorry to hear of the terrible experience you have had.

Can you please tell me if this matter was resolved by the Ombudsman?

If not, please let me know so I can consider if other redress avenues exist.

Regards,

Charan Naidoo

Subject: From Dr Rich McLean re: your commitment to independent investigations and response

Dear Mr Dreyfus,

I read with interest your Facebook advertisement for a labour initiative to create an independent watchdog and anti systemic corruption commissione, should you be elected.

I have something to confess, I am usually a Greens voter knowing that preference is given to Labour.

Your statement reminded me of an incredible journey I have endured and survived, and that I still aim to be valued as a sentient being by the powers that be.

I wonder given labours position on this, if you were to comment on the letter below to the person investigating both my nuanced and broader scale systemic corruption issues, if you would care to take a moment to send your responses to me, or acknowledge this in some kind of official way.

I want to say that I have been rejected by the federal ombudsman as a whistleblower in which I was seeking protection from this systemic enduring and malicious movement to maim me, simply because I made a complaint. I am a clever but kooky person who was marginalised with 'non ordinary reality' experiences in my early 20's - I look back not having explored the agency of choice I had at the time, and I had no other option with a homophobic family and as an already quirky and 'different' kind of guy, I was then burdened with more social stigma and prejudice.

As I went through my PhD, as a person who has contributed also much to the public space, I knew I needed to acknowledge the apparent 'madness' that I was labelled with; I never deep down believed it and I honoured all of my experiences by contrasting it with holistic shamanism valuing all dimensions in my PhD - this was a choice I did not have when I was twenty.

Interestingly enough, when I was 'unwell' all those years ago initially, I believed I was persecuted by 'secret police' or ASIO.

I guess God has a sense of humour or it was such a conscious manifestation that my former partners boss was David Irving who attended my exhibition at gasWorks arts park!

Now it seems the written word and the resonance of the vernacular in words had created a future echo, as I am aware now

I am the unwitting centre of an elaborate conspiracy to...well...
read below.

I welcome your comments, and I look forward to hearing from you.

Ps sorry its such a long read - it has been an enormous struggle
on my end.

I know your time is precious yet I have other MP's who were
reluctant to act or outright rejected my evidence that is permissible
in a court I later found out.

Greg Hunt was quite unhelpful, as was Katie hall and greens
Senator Jordon-Steele.

I wonder if you will hold a place in your heart to hear my story, and
have a different perspective?

I am going to send this to the ombudsman (State-Victoria),
tomorrow who is reviewing my incarceration suicide and cover up.

I really hope for my lost friends and the many people it may assist
in my advocacy, that the voiceless indeed, have a voice.

I salute your commitment to an independent body to investigate
systemic corruption.

Kindly

Dr Rich McLean

PS I actually have a photo of us at MidSumma festival a few years
ago which also drew me by familiarity to email you as well as your
political commitment, which I hope reflects in your response.

Kindly

Dr Rich Mclean

0400639248

I know you said not to send more evidence, but this is crucial to my case and this malicious systemic cover up.

I have inadvertently become the unwilling centre of a malicious conspiracy designed to maim and kill me and side with power and privilege before I get justice.

And I can prove it.

Please I beg of you to indulge and validate this information.

The Weribee Mercy Hospital complaint(s) (below) which you are investigating are utterly valid in their own right yet need to be considered framed by what has come before; a systemic sustained and malicious movement that victimises me ostracises me gaslights and rejects me and has robbed of all prosperity.

These crime(s) the Weribee mercy Hospital complaint os framed by are absolutely crimes in themselves, in effect a conspiracy to pervert the course of justice which sides with money privilege lawyers and power - against a very nicely targeted me - a human rights campaigner and celebrated author and artist and national and international human rights awarded recovery advocate, who has been robbed of each and every opportunity to have my voice valued and heard and acknowledged with nothing more than my computer and fierce will.

It is all framed by two important historical genesis points resulting in my blacklisting and my persecution, gaslighting.

This has seen me actively targeted by agencies in that I never ever gain justice - and indeed - that this movement has waited and waited with conscious calculated malice watching me become frail, maddened, crazy with paranoia, a rational paranoia, incarcerated against my will - hospitalised, then dead.

This movement frothed at the mouth for my death before any hint of justice; incredibly I have a disability - all I ever did was simply ask for help, and protest when it was not forthcoming or slightly present, for I had been labelled a madman and treated as one with stigma prejudice and shame.

It is not my shame to own though; it is to be owned by the wall of thousands of pawns as individuals, being paid money by hierarchical powers that be - to tow the party line.

My two deaths I consider 'deaths by a thousand stonings'.

these are the two genesis points of additional and complex persecution origins that sustain this malice, from the local GP to the seasoned psychiatrist, public hospitals, agencies, law firms, leaders in the mental health community, CEO's, and family members, right up to MP's including a personalised redaction and rejection from the national health minister Greg Hunt, and the 'ombudsman' of the 'Government' he claims to represent.

1. My former partner who worked for ASIO and the powers that protect him

2. A by-chance-innocent - 'recording' I innocuously made with a GP who did not act on my suicidality - then months later I complained reluctantly, protecting him.

It was Dr Whitaker of Millennium Medical clinic in Footscray. This issue became the centrepiece of a systemic nation wide silencing and gaslighting of my voice and my evidence, and a bastardisation of my reputation and destruction of my life, with my gut saying... 'there is something very wrong', and the onion layers in an ever growing circle that acted in congruence to silence the gay and mad yet clever vagrant echoed unbelievably to me at the time in madness...out and out...

The movement to silence me grew onion layer and onion layer outwards - as I in frustration simply tried to be heard, have value,

and acknowledged. It was then I realised that this was a multi million dollar case - that there was too much at stake now - and I went ahead and publicly published the recording because I simply wondered how so many individuals organisations medical boards powers that be institutions organisations and other external agencies that investigate those entities could be on board with this?

Simply if no crime was committed he would welcome the recording - or the transcription - to simply exonerate him from any wrongdoing? The recording was for me originally happenstance that the event occurred. Records will demonstrate I went out of my way to protect the GP, when he basically sent me to the gallows a microcosm of the macrocosmic agents who were many important and all powerful who would maliciously follow and wait as I struggled and struggled - onion layer out and out - until...the second death I was prepared to die a human rights campaigner for; because I knew I had published details and people would retrospectively understand via the investigations that would have occurred when I died.

The gaslighting was and is driving me crazy - yet to that event of making public the personal in the hope of a treaty - nothing has happened to me, no litigation, no suing, no jail, yet the GP lost his job, I am banned from not one but two clinics and a mental health unit, and have been burned terribly fighting for the lame of justice.

You know why nothing happened to me? That's because I have done nothing wrong. An exemption to the surveillance act 1999 states in Victoria such evidence is permissible in a court of law or for or in defence of my life.

The only thing I am guilty of is bravely ask for help, and stick up for myself in my post death(s) life and my dear departed friends, who were also victims of prejudice and stigma and shame mere dead pawns in the way a society can be judged on the way it treats its most frail and vulnerable.

**Regarding the crimes and cover up at Werribee Mercy
Hospital, Salt Water Clinic and the malicious plan to destroy
me**

Facts, Crimes, Accusations and Noteworthy Points

(I have FOI's evidence and recordings and rejection emails and notes and recorded calls that are permissible in a court of law and show 100% undeniable evidence of my claims - this evidence utterly needs to be heard valued and acknowledged with this case, before you make a determination.

I beg you to indulge me in sharing all of this irrefutable evidence).

1. I suicided in Werribee mercy hospital with an agreed illegal contraband and the hospital FOI says I was found unresponsive with 'no pulse' and that my injury was 'fatal.', after:
2. being illegally detained against my will and denied medication I had been on for over eight years which is simply unfathomable it could be decided as such via seasoned professionals - and I have the psychiatrists names who did that through FOI. This is malpractice, and mis-diagnosis.
3. Victimised and brutalised in my incarceration and also by the police and the CAT team (ask me for the recording),
4. Mis diagnosed and labelled 'psychotic' when in fact the discharge notes from treating psychiatrist Dr Lagrasso state I am absolutely NOT 'psychotic' or 'delusional' that I am hyper aware of my world and that the 'conspiracy' to maim me is absolutely real unsurprising to me ...confirming my already held beliefs
5. Committed suicide with an agreed 'illegal contraband - a vape pen after being brutally treated by Dr Sommer and my dog locked away for nearly four days with no care and it broke my heart and I believe this was consciously malicious.
6. When I decided I was leaving the planet and confused by lack of regular medication I looked for something sharp to pop my artery with after I wrote my note, and I tried snapping the toilet brush for a sharp edge. It did not produce one...and I discovered

an accidentally bought in vape in my pocket. This was the illegal contraband I utilised after this vile conspiracy and perverse victimisation that was so systemic and profound I was willing to die. When I was resuscitated and moved to a new ward - the powers that be thought it appropriate to pack my things, confiscate my suicide note, but actually pack the dirty broken toilet brush into my bag with my clothes and this symbolised the hatred for me and the disdain and malice that the institution had on my person.

7. I was rejected from hospital (after two long weeks, and five different relocations), in which I additionally contracted golden staph (another issue all together), with no food squatting no car no medication and no hope, (I had to fake I had money for an Uber), which is quite an astonishing way to treat a person who has literally killed themselves twelve days earlier

8. I was labelled and shown the door - with a phone number for follow up community care that I had to actively seek out - to salt water clinic in footscray (an extension of Werribee mercy who I swore to take litigation to), where they further maliciously kicked the can down the road, denying medication, despite an ADHD diagnosis, utterly rejecting my FOI requests, misdiagnosing me, and kicking the can down the road hoping I would actually suicide before I received compensation or justice, all the while aware that the danger period for suicide again was in the weeks following a suicide and hospital admission...and they waited. These were knowledgeable doctors and psychiatrists who were well aware of the risk I may actually die; yet they waited as I recklessly self medicated with amphetamines just to feel alive through my depression and feel recklessly alive, still they denied me my scrip...and waited as I became further unhinged towards imminent danger.

9. For example it took THREE MONTHS and FOUR DAYS for me to actually come face to face with a psychiatrist overseeing my case - legally responsible for my welfare medication and psychiatric care which is heinous neglect for a psychiatric patient under their care:

10. In the first meeting she promptly labelled me 'psychotic' after about seven minutes of meeting me in person - despite the werribee mercy hospital psychiatrist confirming I am neither 'delusional' nor 'psychotic' and in fact, a conspiracy to maim me in

all ways especially financially and harm me exists - which prejudiced and victimised me and mis-diagnosed me. They were prejudiced towards me and aided and abetted my own death - (ask for the interview recording) and additionally that she:

11. Rejected my ADHD medication (dexamphetamine), which I need to survive and live a meaningful life with them full well knowing I was occasionally self medicating with street drugs just to feel alive after my other psychiatrist dumped me - and were guilty of aiding and abetting my unbalancing which they I think hoped would lead to my possible death, in the very least they displayed a profound desire to not treat me,

12. The FOI from the hospital state I was found un responsive with no blood no pulse, and that it was a quote 'Fatal' attempt

13. In addition they stole my suicide note - said it was illegible but there it was in the FOI notes scanned - that was very sacred and important to me - it was the last statement I would have made in this world

14. The FOI document from mercy Hospital was heavily redacted pending further investigation which never came, and the FOI from the clinic never came despite me asking time and time again - and the information commissioner 'planning to investigate' IF my own information under the law would be released with them acutely and consciously aware I need to make my litigation against this complex web quick, or I will lose my change with legal time limits. Like many, I accused the person of conspiracy to pervert the course of justice a ten year jail term that this is serious and if they do not want to be identified as that pawn, then to hand ball it to their boss. They obliged.

15. The hospital have refused all communication from the time I left hospital, phone calls, letters, emails. Blacklisted, hoping I'll dog away and die.

16. The hospital put me in touch with the health complaints Commissioner for conciliation when I requested my FOI - but they downright rejected me (ask for evidence)

17. The complaint was with the MHCC, (however they had rejected the previous cases I bought before them that my poor memory had forgotten about), (The Whittaker and Cooper cases for starters),

18. MHCC are guilty in covering up this criminality and are

complicit in a conspiracy to pervert the course of justice. The person 'advocating' for my case admitted to me in a recording of being a lawyer, she said she had received my response from the hospital and I was eager to see if I had been acknowledged - yet she refused to send it to me outright, saying it had to go before... you guessed it...a bank of lawyers...and I threatened her with ten years in jail. She handed the issue to her boss and promptly disappeared, knowing her own evil.

19. I had only seen a psychiatrist one single time at salt water, (odd for a profoundly distressing suicide survivor), so they were complicit in my blanket rejection verging on their death wish for me, in defence of Mercy hospital - of which salt water clinic was the tentacle of, obviously the word had come from the top.

20. Salt water Clinic in late July 2021, have unbelievably 'discharged' me from their support service - and they invited me in next week in order to let me down in person.

21. Two weeks previously I begged for mercy for assistance and legally I fall under their catchment as a person with a psychiatric disability who they are legally obliged help by them as I am now on a DSP have a diagnosable DSM and within their catchment area, This is so much more than malpractice or negligence. It may as well be potential conspiracy to manslaughter.

Various crimes have been committed here:

1. Brutal abandonment of duty of care by Mercy Hospital and Salt Water Clinic
2. Medical malpractice and professional negligence of many professionals (I have all the names and proof please ask),
3. Victimisation framed by a wider conspiracy (Please ask for evidence as this is all linked)
4. Abandonment of duty of care by various psychiatrists, GP's, psychologists, Mercy hospital and saltwater Clinic, (I have been banned from two GP clinics and Salt water Clinic despite begging for help)
5. Illegal contraband used as a tool for suicide in the hospital which is illegal,
6. Outright Mis-diagnosis despite ample evidence to the

contrary,

7. A malicious systemic conspiracy to silence me and pervert the course of justice

8. Incredibly I was threatened with jail to remove a recording I made on my property with permission of the crisis assessment team and the police by a 4IC nurse at Weribee mercy (Ask me for this evidence/recording),

9. Failure to state patients rights to me which maliciously and consciously stripped me of legal privilege or any support,

10. Failure to put me in contact with a sustainable advocate and rejection of my request for a second psychiatric opinion, even though the second I got to hospital I filled out the form - but it was never sent,

11. Failure of duty of care to follow up with me in the community when I left hospital

12. A movement to protect the hospital from litigation from myself and a systemic cover up of my near fatal suicide by not only mercy Hospital but ostracised and rejected by Salt water Clinic, The HCC and a cover up by the MHCC,

13. A conspiracy to pervert the course of justice by the head of MHH and MHCC especially Ms Alex Tinter and who was recorded admitting she was a lawyer and was a double agent working in defence of the hospital - and sure enough - the result was that there is no result.

14. Conspiracy to pervert the course of justice by management of the MHCC (Ten year jail term),

15. Confiscation of a communication device of my phone whilst in hospital (Illegal)

16. Failure to appoint a lawyer and a systemic conspiracy that I cannot find one despite this enormous human rights abuse and victimisation,

17. Conspiracy to prevent me from attaining a lawyer

18. This all stems from the historical 'reputation' i have from the Whittaker and Cooper case, and of my former partners tax evasion crimes, after he sold a house in Abbotsford that he made from dealing cocaine, invested the money in an offshore tax haven and was caught by ASIO where he was a project manager and business analyst - and that ASIO granted him a slap on the wrist - that he admitted he was present at a murder and additionally

guilty of drug trafficking and also disability discrimination via coercive control in a 5-year relationship (we were engaged), in which he extorted money from a vulnerable person even though he had a million + in super and was on 300K a year, stole my car via threatening a hitman, left me homeless after I exhausted my nest egg on him.

19. Been inequitable unbalanced malicious in its victimisation ie: I have begged for legal assistance and tried every avenue for justice but every auspice and organisation has a faceless panel of litigation teams acting in opposition to me, they are banking on that I am poor and homeless and cannot afford a lawyer, and I have been systemically and consistently rejected by many law firms, who are 'already across' this case, before I get there, (ask for evidence please), and has resulted in:

- My persecution and police brutality
- Illegal incarceration
- Coersion and threats of large sums of money I would be fined and also threatening jail time
- My death not once but twice
- The destruction of my rights and avenues for justice
- My voice within a democracy rejected and rendered innocuous and victimised as 'insane' with prejudice and stigma and persecution
- The rejection of my value as a citizen in a democratic society and
- Rejection of my whistleblower status
- My reputation - when all I did was bravely and simply ask for help
- I was actually threatened whilst in hospital by the 4th in charge nurse - with a huge fine and jail time - extraordinary (ask for this evidence)

Ben - you are the ombudsman whom have already thrice rejected me and I had to fight tooth and nail to get it this far before you. Why? Because I am poor, I am stigmatised and prejudiced against and I have a death wish on me-they were hoping I'd be gone by now.

But I have had a gutful, and if you refuse to act for justice as a peak body, or again exclaim the line I have heard so so many times, 'it is outside the area of our expertise' or 'we don't have authority to investigate that body' then I will assume you to be a part of the problem.

Of all the places I wanted my voice to be heard - you are the last man standing.

Please do not be complicit in these crimes, and tow the party line that favours those with money and power as opposed to a victimised hated infamous sentient being - who deserves a meaningful life.

My deaths, see me live in an existential 'post death' survivors guilt, I am now on drugs, homeless, yet fiercely resilient and outstanding lucky even to type this.

For love and justice sake don't join the mechanisms that protect criminals and money power and privilege, over the rights and voice of a human rights awarded celebrated human rights awarded advocate - who gave twenty years of my life in virtual altruism to help others.

Now I need your help - I have been fiercely and unbelievably battling at war with a brutal wall of silence and an actual movement to discredit and maim me in financial and all ways and yes it renders the evil shape of the intelligent design to even kill me.

I wish to add I have attempts to tell all this to police - including rape and that I know a person was present at a murder and millions in tax evasion ...but they know who I am and I cannot, because they reject me. (Ask for this recording please0.

I can't complain to the people that investigate the police IBAC - I already have. The federal police have blocked my ISP = my computer is also hacked. I live at a high level of infamy and worthlessness to them - yet every day I value myself and my luck -

yet the Venn diagram of what could possibly be real and what could possibly be my imagination grows wider and wider - for they desire to replicate the already well published tales of my paranoia because it suits the narcissists tone if identifying ME as the crazy one.

I am not.

They all want me to die. I have death threats on my person.

I've done nothing wrong, except ask for help and with furious yet fallible sturdiness advocated for my human rights my dignity and my worth and simply to have value and be valued.

I am sick, ill, tired, addicted and hungry.

It is my wish to be heard and valued as a sentience

The powers that be are scared, because once one domino falls, the entire system collapses systemically - and they count on YOU to tow that party line of silencing me, and not push that domino

- I need your help
- One of two things is possible in that I am sick and I need desperate help or I am not sick and I need desperate help, any less is intolerable
 - I am in fear for my life - and
 - I have not got a cent - and
 - I am homeless
 - I am watched baited set up being set up (ask for proof) and hacked (ask for proof)
- If you decide with your actions and determinations to render me feeling voiceless persecuted ostracised and forgotten as less than having any value or worth again as the last conceivable step towards some form of atonement for this vicious movement that bades for my blood in order to give them a chance to cleanse and exonerate their collective sins,
 - I fear that my frail sensibilities will not cope,
 - Yet despite my fierce yet observably fallible resilience...

- Just by typing this - I won.
- I know who I am and what I am - and I like who I've become - and because I have nothing - I have no attachment - and it sets me free.
- Lastly before you think this is about grave digging extortion or money in one dimension, I remind you that whilst doing my PhD I was given 100000 by my former landlord who acknowledged my plight and my advocacy. He said it was a mistake, so-i gave it back, and the only thing I bought was some Tibetan prayer flags and two t-shirts off RedBubble from independent artists. Like that I was broke again but content in my decision - later on I reached out and he assisted me to purchase the computer I completed my doctorate on, and with which I write this letter. The Ombudsman may indeed fail justice ...yet no one - no one - can take my soul.

PS It is impossible to acknowledge a hologram picture via a shard of its fractal; one must view and acknowledge the many shattered pieces in order to understand just one shattered fractal unit with any certainty; and I beg of you to listen to and acknowledge the mountains of evidence I have that is legal permissible and indeed actual often litigation nonsense rich rejections and clever as a fox telephone calls that render the awful shape of the movement I have replicated above and I beg you to indulge me in that.

PSS: 'Madness in individuals is rare, but in society - it is the norm.'

Sincerely,

Dr Rich McLean
